TIG Common OASIS

Presentation to the RRG

June 24, 2005

TIG Common OASIS Charter

"One-stop Shopping"

- Common Attributes for Products & Services
- Common Terms & Conditions
- Common Posting of Information
- Common Queue Management
- Common ATC Method - Flow Based
- Preserve Existing Tariffs & Rights

TC & TP Needs

- TC
  - Uniform Organization of TP Postings.
  - Common Regional Postings: BPs, Queue, etc.
  - Uniform ATC Calculation
  - Ease of use: tutorials & other aids, improved UI, etc
  - Improve TP processing of requests
- TP
  - Common BPs, services, queues, ATC calculation
  - Effective management - TSR tracking, tag processing
  - Administration and Management - timelines, settlements, billing, credit tracking
  - Meet all OASIS requirements

Draft TIG OASIS Proposal

- Phased Implementation
  - Unique NW features and software
  - NW "one-stop shopping"
  - West-wide "one-stop shopping" for customers
- Short-term (1st 6 months)
  - Lay the Foundation
- Near-term
  - Build for the Future

Short-term Implementation Goals

- TCs: purchase from all TPs on one OASIS
- TCs: better visibility of own and others requests and rights
- TPs: better management of transmission business

Implementation Plan - Short-term

- Consistent/logical posting of TP information
- Better access to information - outages, offerings, etc.
- Improve TC user interface
- Develop Specifications for Common Queue, Administration & Management

Implementation Plan - Near-term

- Implement Centralized Administration and Management Functions
- Implement a Common Queue
- Develop common products, services, BPs, etc.
- Develop and implement OASIS changes to support adoption of regional operations: flow based ATC, congestion management, regional tariff, etc.

Issues & Future Work

- Governance
  - NW Organization & Structure
  - West-wide Cooperation
- Common ATC Calculation
  - Common ATC - IOU PTP and BPA Constraint Schedule Management
  - Flow based ATC & Joint PNW Tariff
- Common Administration & Management
  - Common Queue
  - Back-office support; tracking of timeline and BP requirements
